

## Flood Plain Permit

The current Flood Plain Order for Archer County requires a Flood Plain Determination, before any new construction starts. This includes residential, commercial, and agricultural buildings.

The cost of a Flood Plain Permit is \$100.00. If you have an Engineer's Elevation Certification, this fee may be waived.

If you are preparing to build in a Hazardous Flood Plain Area, an Engineer's Elevation Certification will be Mandatory before a Flood Plain Permit is issued.

The Flood Plain Permit can be obtained in the Emergency Management Office, 940-574-2868.
